# Food Reclosure

Resealable labels are valued by consumers, giving them open/close packages that prevent food contamination and spills. Brand owners also benefit, because food products stay in their original packaging, increasing brand exposure in the home.

Labels placed anywhere on a pack can be removed or reapplied as desired without leaving adhesive residue. They are a cost-effective and efficient alternative to zippers or hard reclose packaging.

The Avery Dennison reclosure range for food suits applications ranging from simple dry goods needing a limited number of opens/reclosures through to products with challenging contents – with adhesives that perform time after time.

## Key features

- Food compliant, topcoated materials
- Three food-friendly adhesives
- Simple or high performance applications
- Safe to use in all food contact applications

## Application areas

- Dry foods
- Frozen foods
- Fresh foods

## Adhesives for dry reclosure

### C3

C3 is a highly transparent adhesive with high ageing stability, suitable for dry food reclosure applications

### R5050

For more demanding applications, R5050 features good tack and adhesion in combination with superior and clean removability from most substrates. The adhesive allows label application at a wide temperature range, and it retains its removable properties even at very low temperatures.

### R1490M

For very demanding dry, food reclosure applications. The adhesive shows good moisture and solvent resistance, clean removability and a smooth and quiet peel from PET and PP substrates.

Application	# of reclosures	C3	R5050	R1490
Bakery	24-30	✓		
Cookies & cereals	12-15		✓	
Confectionery		✓	✓	
Sweet & savoury	1-3	✓		
Rice & pasta	1-3	✓		
Tea & coffee	12-15		✓	
Meat & cheese	3-6		✓	✓
Frozen food	1-3		✓	✓
Dry tissue	9-12			✓
Tobacco	15-30			✓
