

Beer Can

Bottles are increasingly being replaced with cans. In part, this is because cans are a more efficient packaging process, made more affordable with mobile canners and smaller scale canning lines. Amenable to PS labeling, cans offer a greater surface area than bottles for impactful branding.

For creating look-at-me labels with eye-catching colors, standout imagery, unique shapes and surprising textures, nothing compares to PS labels, which offer shorter lead times, faster dispensing and smaller MOQs. They can be produced digitally for short runs or seasonal brews, and can make it easier for smaller beer brands to compete at the shelf through special printing techniques like foil accents, metallic colors and varnishes.

Key features

- A broad portfolio offering white, clear, silver, and black options
- Delivers black labels without white edges
- Excellent printability including digital printing
- Suitable for foiling, embossing and varnishing
- Excellent service and minimum order quantities

Application areas

- Craft beer
- Cider
- Wine
- Spirits
