

Digital Labelling

Digital labelling solutions offer exceptional speed, flexibility and customisation – allowing businesses to create bespoke labels for printing on demand.

The technology is growing fast. Digital solutions greatly reduce inventory and revision costs after initial OEM investment, and give versatile labelling that adapts quickly to branding requirements. Sheer flexibility, along with multiversioning capabilities, also deliver improved sustainability and supply chain efficiency by printing only on demand to reduce stock on hand and eliminate waste.

Our digital materials portfolio supports all major digital labelling presses in different technology groups including HP Indigo, Xeikon, UV Inkjet, and water-based Inkjet. The portfolio includes newly developed UV Inkjet wine stocks that give maximum colour vibrancy, uniformity and text clarity. UV Inkjet and water-based Inkjet offer a number of performance and cost benefits compared with flexo, and in some cases with electrophotography. Digital Inkjet has the highest projected growth rate for digital label printing over the next five years.

Key features

- Supports all major digital labelling presses and technologies
- High quality printing on demand
- Performance and cost benefits
- Multiversioning
- Rapidly growing market

Application areas

- Mass customisation
- Printing on demand
- HP Indigo, Xeikon, UV Inkjet, water-based Inkjet
